

13. srečanje kluba alumnov Oddelka za lesarstvo BF UL

13th annual meeting of the alumni club of the Department of Wood Science and Technology BF UL

Katarina Čufar, Boštjan Lesar

Člani ALUMNI kluba Oddelka za lesarstvo Biotehniške fakultete Univerze v Ljubljani (OL BF UL) so se 26. 11. 2020 zbrali na tradicionalnem 13. srečanju. V okoliščinah pandemije covid 19 je bilo to hkrati tudi prvo srečanje alumnov, ki je potekalo preko spleta. Srečanja se je udeležilo več kot 45 udeleženk in udeležencev vseh generacij. Program je vseboval formalni del s kratkimi predstavitvami in neformalno spletno druženje.

Udeleženci so v okviru konferenčnega dela poročali o novostih in dogajanjih v zadnjem letu. Katarina Čufar in Boštjan Lesar sta kot vodji predstavila živahno dejavnost alumnov v okviru Univerze v Ljubljani, ki ima profesionalno platformo <https://alumniul.online/> preko katere se v klub lahko včlanijo vsi, ki so zaključili študij na Univerzi v Ljubljani. Organiziran je v sekcije, naša se imenuje »BF - Klub alumnov lesarstva« in ga podpira ter dopolnjuje sekcija ALUMNI klub Oddelka za lesarstvo v okviru Društva lesarjev Slovenije (DSL).

Vodenje DSL je v letu 2020 prevzel mag. Tomaž Kušar, zaposlen na Oddelku za lesarstvo, ki je na srečanju predstavil živahno delovanje društva.

Novosti na Oddelku za lesarstvo je predstavil prof. dr. Marko Petrič, novi prodekan za področje lesarstva za obdobje od 1. 10. 2020 do 30. 9. 2022. Marka Petriča naši alumni poznajo kot odličnega profesorja in znanstvenika, ki je bil v obdobju 1. 10. 2002 – 30. 9. 2004 namestnik prodekana, v obdobju od 1. 10. 2004 do 30. 9. 2010 pa kar tri mandate prodekan za področje lesarstva.

Na srečanju se je predstavila tudi generacija 1985 – 1990, ki letos praznuje 30. obletnico diplome. Z besedo jo je orisala mag. Majda Kanop, ravnateljica Srednje lesarske šole Ljubljana, kjer so vzgojili številne alumne, ki so uspešno nadaljevali in zaključili študij na naši fakulteti. V letu 1985 se je na univerzitetni študij lesarstva vpisalo okoli 60 študentk in študentov, do zaključka pa jih je prišlo 27. Danes jih 13 deluje v lesarski panogi, 3 v šolstvu, 11 pa na drugih področjih (inšpektorat, turizem, ministrstvo, občina, privat ...). Generacija je ostala povezana in se srečuje skoraj vsako leto, vsakič v drugi regiji. Tudi njihovo srečanje so v letu 2020 zaradi pandemije organizirali preko ZOOMa.

Alumen Robert Gomišček je predstavil novo kolekcijo YPSI chair, inovativnih in lepih izdelkov podjetja Linea r d.o.o., od ideje do trenutka, ko so pripravljene za predstavitev na trgu.

V neformalnem delu je potekalo srečanje interesnih skupin po ločenih virtualnih prostorih. Udeleženci so bili najprej razdeljeni v skupine po izbrani povezovalni lastnosti, nato pa so med skupinami lahko prehajali. V majhnih skupinah so se razvile živahne razprave o preteklosti, sedanjosti in prihodnosti alumnov in stroke, izzivih študija in dela v razmerah pandemije, poslov in osebnih stikov. S pogovori smo osvežili stike, kar ohranja skupnost živo in aktivno. Druženje po skupinah je pokazalo, da je tudi video srečanje lahko zanimivo.

Srečanje so organizirale sodelavke in sodelavci Oddelka za lesarstvo (OL) v sodelovanju z Društvom lesarjev Slovenije, kamor je včlanjena večina alumen in alumnov. Poleg zgoraj omenjenih se posebej zahvaljujemo dr. Mateju Joštu in dr. Jožetu Kropivšku za odlično načrtovanje, izvedbo in tehnično podporo video konference. Hvala tudi dr. Davorju Kržišniku za neutrudno podporo v vseh fazah organizacije in izvedbe srečanja ter seveda vsem udeleženkam in udeležencem, ki so z dobro voljo pripomogli, da je srečanje uspelo.

V veliko pomoč delovanju kluba je stalna podpora strokovnih svetovalk dr. Tanje Potočnik Mesarič z Biotehniške fakultete (BF) in Barbare Baragater Tine Malenšek Kojić z Univerze v Ljubljani.

Upamo, da se kmalu spet srečamo, in to v živo.

Alumni of the Department of Wood Science and Technology of the Biotechnical Faculty, University of Ljubljana (OL BF UL) gathered on November 26, 2020 at the 13th traditional annual meeting. This was also the first online alumni meeting, due to the pandemic. The meeting was attended by more than 45 participants of all generations. The program included a formal part, with short presentations, as well as an informal part.

The participants reported on the most important news. Katarina Čfar and Boštjan Lesar, the leaders of the alumni, presented the lively activities of the club within the University of Ljubljana, which has a professional platform <https://alumniul.online/> through which all those who have completed their studies at the University can join. It is organized into sections, and ours is called "BF - Klub alumnov lesarstva", and is supported and supplemented by the ALUMNI club section of the professional association "Društvo lesarjev Slovenije" (DSL) <http://www.ditles.si/>. In 2020, the management of DSL was taken over by Mag. Tomaž Kušar, a staff member of the Department of Wood Science, who presented details of the activities of the association.

New developments at the Department of Wood Science were presented by Prof. Dr. Marko Petrič, the current vice-dean elected for the period 1.10.2020 to 30.9.2022. Many alumni know Marko Petrič as an excellent professor and scientist, who also led the department in the period 1.10.2004 - 30.9.2010.

The alumni of the generation 1985-1990, celebrating the 30th anniversary of graduation, were presented by Mag. Majda Kanop, the principal of the Secondary Carpenter School in Ljubljana, who helped educate many alumni who successfully continued and completed their studies at the OL BF. She reminded us that in 1985 about 60 students enrolled in the university study of Wood Science and Technology, and 27 of them successfully graduated. Today, 13 of them work in the Wood Science and Technology sector, three in education, and 11

in other fields (inspectors, tourism, ministries, municipalities, and private enterprises). The generation has remained connected and meets almost every year, each time in a different region of Slovenia, although their 2020 meeting was also organized as a video conference.

Robert Gomišček presented the Ypsi chair from the Linea-R d.o.o. He also introduced a collection of innovative and aesthetic products, taking us from the initial idea to the final product ready for presentation on the market.

The informal part was a meeting of stakeholders in virtual breakout rooms. The participants were first divided into groups, but afterwards they could move between them. These small groups provided an environment for lively discussions about the past, present, and future of alumni, and of Wood Science and Technology, the challenges of studying, teaching and business during the pandemic, as well as other issues. We thus refreshed many of our personal links, which help to keep the community alive and active.

Virtual socializing in groups showed that even video meetings can be interesting. The event was organized by the staff of the Department of Wood Science and Technology in cooperation with "Društvo lesarjev Slovenije". In addition to the above-mentioned colleagues, we especially thank Dr. Matej Jošt and Dr. Jože Kropivšek for their excellent technical support of the video conference. Thanks also to Dr. Davor Kržišnik for his tireless support in all phases of the organization and implementation, and of course to all participants in the meeting. We thank the professional advisors Dr. Tanja Potočnik Mesarič from the Biotechnical Faculty (BF), as well as Barbara Baraga and Tina Malenšek Kojić from the University of Ljubljana for their constant support with the activities of alumni club.

We all hope to meet again live very soon. ●
